

**RE: Lafourche Parish Water District No. 1
Public Service Announcement**

Customer Update

Released as of Friday, January 26, 2024, (Midnight)

Social Media Disclaimer:

If you are viewing this Public Service Announcement on Social Media, you are urged to visit www.lpwdla.org to confirm it is accurate and up to date.

For Immediate Release:

The Lafourche Parish Water District lost all water pressure in its distribution system between the Hwy 654 Bridge (Gheens Bridge) and the Lafourche-Jefferson parish line. This is a result of a mainline leak near the South Water Treatment Plant. Customers in these areas will have no water pressure until the leak is repaired.

Crews are working diligently to complete the repairs, however a timeline for completion is currently unknown. Once repairs are made, it will take some time for the system to re-pressurize. Therefore, customers should still avoid non-essential water use when water service is restored. Your cooperation is vital to ensure adequate water quality and quantity are preserved for all communities within our water system. Thank you for your assistance and understanding.

Updates:

Customers should stay tuned to News Media outlets and monitor the Lafourche Parish Water District's Website at www.lpwdla.org for further updates and additional information.

News Media Note:

Please repeat this announcement several times a day until further notice and advise the public that this information, along with future updates will be posted on the Lafourche Parish Water District's Website at www.lpwdla.org.
